

THE NEW

MOKKA X

PRODUCT INFORMATION GUIDE

The new MOKKA X

The new MOKKA X builds on the success of its predecessor by adding the X-factor. With its muscularly toned body, emphasised by its sleek sculptured lines, that proudly carries the beautiful new badge, the new MOKKA X is a rough diamond that combines the exquisite with the extreme.

The powerful yet seductive design, rich choice in infotainment, **high seating position**, new safety features and spacious interior appeals to a wide range of customers, with its main focus set on customers ranging from the traditional mainstream and social climbers to city dwellers that will appreciate the compact size and smooth automatic gearboxes. No matter who the customer is, what they do or where they come from, the MOKKA X is a perfect fit for all lifestyles.

Thrill-seeker on the outside, sophisticated connoisseur on the inside. The new choice in infotainment systems includes an **8" colour touch screen** (optional) with integrated on-board navigation or a **7" colour touch screen** that connects directly to your smartphone to access your phone book, favourite maps for directions, music and much more.

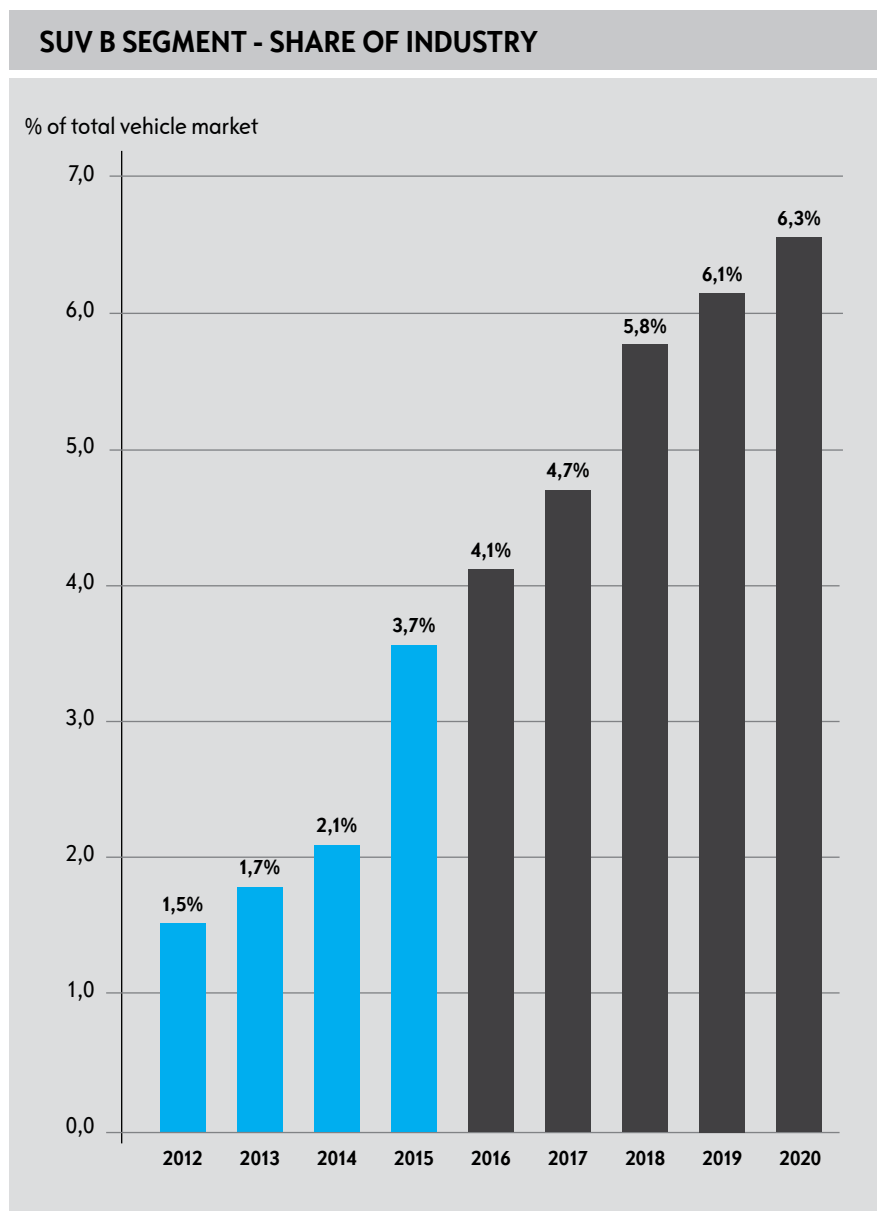

Optional AFL LED headlights and LED tail lights raise the new MOKKA X to the level of the best equipped B-SUVs on the market. Other premium features include High Beam Assist, a reverse camera, a heated steering wheel and heated front seats.

The MOKKA X is all about having no limits, and whether you're tearing up dirt roads, or zipping through traffic, you'll find it compact in size and big in attitude.

New MOKKA X. A segment benchmark.

Segment overview

Since 2012, the B-SUV segment has skyrocketed in South Africa. When looking at the growth in numbers, the B-SUV segment share of the total market grew from 1,5% in 2012 to 3,7% in 2015, making it the fastest growing segment of all.

The success of the B-SUV segment is all down to the versatility and fashionable appeal that these stylish compact SUVs offer. With other manufacturers entering into the segment within the near future, it is easy to predict that it will continue to grow and become even more competitive.

MOKKA X has been a great success thus far in leveraging this growth opportunity, and has attained 7% total share of segment for calendar year 2015.

Product strengths

Design

- Aggressive stance, sporty, modern and innovative silhouette
- High seating position
- 19" alloy wheels
- Well balanced and proportioned dimensions
- Winning exterior and interior design with one of the highest appeal and reach ratings
- Improved cockpit and centre console design

Driving dynamics

- Disc brakes front and rear, standard
- ESP^{®Plus} including Hill Start Assist and Hill Descent Control, standard with all models.
- Chassis tuning by Opel engineering

Everyday use

- Flat load floor, 60:40 split rear bench
- AFL LED headlights with LED tail lights (optional)
- New infotainment systems
- Ergonomically certified AGR seats

Positioning

The Mokka's size has found a sweet spot, which new competitors are possibly using as a benchmark. The new MOKKA X's winning formula is all down to its thrilling driving experience, stylish design and sophisticated technology, including:

- AFL LED headlights and tail lights (optional)
- Ergonomically certified AGR seats
- Smart infotainment systems

Positioning statement

Compact in size, big in attitude.

SUV B Segment — customer data

Target groups

Mokka drivers all want three things in a car, that it is safe, family oriented and powerful. The exterior styling and appearance of the Mokka appeals to them, as does the overall great performance, the general comfort and interior roominess, character of the car and the stellar reputation.

Mokka is perfect for both male and female customers who want a family car that doesn't look like one. Individuals who are looking for the rugged styling of a full sized SUV, packed into a more compact format that is both safe and comfortable and can express their style and individuality will feel right at home in a Mokka.

Key competitors

Nissan Juke

Mazda CX3

Renault Captur

Ford EcoSport

Key competition

SUV B is the fastest growing segment, a significant number of new competitors have entered the segment to date and this is set to continue in coming years. As a result initial segment leader Nissan Juke has lost over 40% share in 3 years.

To combat this, the new Mokka X will continue to offer major sales advantages against key competitors. A specification comparison highlighting Mokka X wins is shown at the end of this guide.

**New MOKKA X.
Encaptivating exterior.**

Halogen headlights

Adaptive Forward Lighting LED (optional)

Headlight clusters

The beautiful **double-wing signature LEDs** function as daylight running lights, indicators and positioning lights and come as standard. On opening the MOKKA X when equipped with AFL LED headlights (optional), the headlights make a welcoming gesture bringing the MOKKA X to life.

The new MOKKA X's appeal is simply magnetic. The broad-shouldered, wide-tracked stance immediately underlines the **rugged capability** and **solidity** that makes people want to experience the new MOKKA X.

The **muscular** and **athletic lines** radiate self-confidence and modernity that show how the new MOKKA X has evolved and become braver.

The streamlined **AFL LED headlights** (optional), framed by Opel's double-wing signature daylight running lights, make the new MOKKA X look like it is frowning with determination.

This paired with the wide grille that **proudly wears the Opel Blitz**, elevated by the chrome logo bar, gives the impression of a devilish grin of a thrill seeker. To bring balance to the bolder grille and headlight design, more elegance has been applied to the front bumper by graciously coating it in the body's finish.

The new MOKKA X is an **aerodynamic sculpture**; this being the secret behind its beauty. The deep, steeply raked windscreen gives an insight into the **aerodynamic** evolution. The channel arches guide the airflow from the lower air dam into the rear wheel deflectors, which is then pushed backwards.

And just to prove that beauty can also be functional, the new MOKKA X is even more aerodynamic. With a **c_d factor** of just **0,35**, it scores better than the segment average of 0,378 c_d , and even better than the previous MOKKA with a c_d factor of 0,36. This lower c_d factor contributes both to the economy and stability of the new MOKKA X.

Arguments

- Bold, self-confident design
- Impressive aerodynamic lines
- Clear Opel identity

**New MOKKA X.
Beautifully bold.**

Halogen rear lights

LED rear lights (optional)

Tail lights

Crystal clear **LED tail lights** (optional) make you visible from even further away, and with Opel's double-wing signature design, the new MOKKA X's beauty is impossible to be overlooked.

The new MOKKA X is anything but a conformist. The unconventional angled chrome side window linings highlight the raised back of the new MOKKA X, giving it an undeniable **sporting flair**. Mounted proudly on top are the heavy-duty roof rails that wrap themselves securely around the sides.

The gradual gradient roof design glides over the rear windscreen that curves gracefully from pillar to pillar, neatly tucking itself in over the **exquisitely cut tail lights**.

The glistening crown of ruby and pearl LED tail lights (optional), aligned into the distinctive double-wing signature design, as seen in the headlights, let everyone know that the new MOKKA X is an Opel.

In cohesion with the new MOKKA X's poised back, the upswept athletic waistline and the black rocker moulding run along the lower side, giving the new MOKKA X the **dynamic distinction** of a thoroughbred.

The hypnotisingly beautiful alloy wheels, which are framed by the off-road cladding and bumpers, help retain the new MOKKA X's wild side. The new MOKKA X also features redesigned bumpers, skid plates, fog lamps and reflectors.

From the first touch of the weighted door handles, the customer is welcomed with the feeling of **purpose** and **ambition** and on opening the new MOKKA X, the width and height of both the front and rear doors becomes apparent.

Arguments

- Short overhangs for go-anywhere appeal
- Elegantly sculpted side and rear styling
- Powerful stance and ground appearance from any angle

New MOKKA X. Intriguingly inviting.

Despite its external rigorous appearance, the new MOKKA X is balanced by its refined, **luxury interior**.

On entering the cockpit, the first thing that will be noted is the level of quality and minimalism achieved.

Since the previous Mokka, many of the functions and features have been integrated into the centre console. Storage space has been optimised and is as clever as it is elegant. The improved arrangement greatly improves functionality as well as intuitiveness of the cockpit on the whole.

The delicate curves, swooping, overlapping and intertwining along with the **high-quality trim materials** really highlight the new MOKKA X's interior architecture, which is cool, calm and sophisticated.

The new dashboard graciously arches over the instrument panel and effortlessly sweeps across the front compartment. **Chrome detailing** around the air vents, instrument panels and steering wheel, along with the optional **high-quality leather** trims, show how every detail in the new MOKKA X has been seen to.

The airy, uncluttered front row is enhanced in such a way that when inside, it gives both the driver and passenger a grand perception of **spaciousness**. The elevated position empowers the driver by providing a clear overview of the road ahead.

Arguments

- High, commanding driving position
- Outstanding ergonomics and quality feel
- Big-car feel with compact-car driving characteristics

New MOKKA X. Downsized outside, upsized inside.

The detailed refinement and high quality of the cockpit naturally extend throughout the cabin of the new MOKKA X.

The deeply contoured seats and **graceful décor** that swoops and glides around the interior demonstrate the time and effort that went into the design of the new MOKKA X.

With the **flexible rear seats** that can be flipped and folded, Opel proves once again that the beauty of the new MOKKA X is far from skin deep.

Colour-coordinated premium fabrics including leather trims, are as important to the passengers as to the drivers.

Parents will appreciate the high and wide opening doors and ISOFIX points that help make getting children into the car child's play.

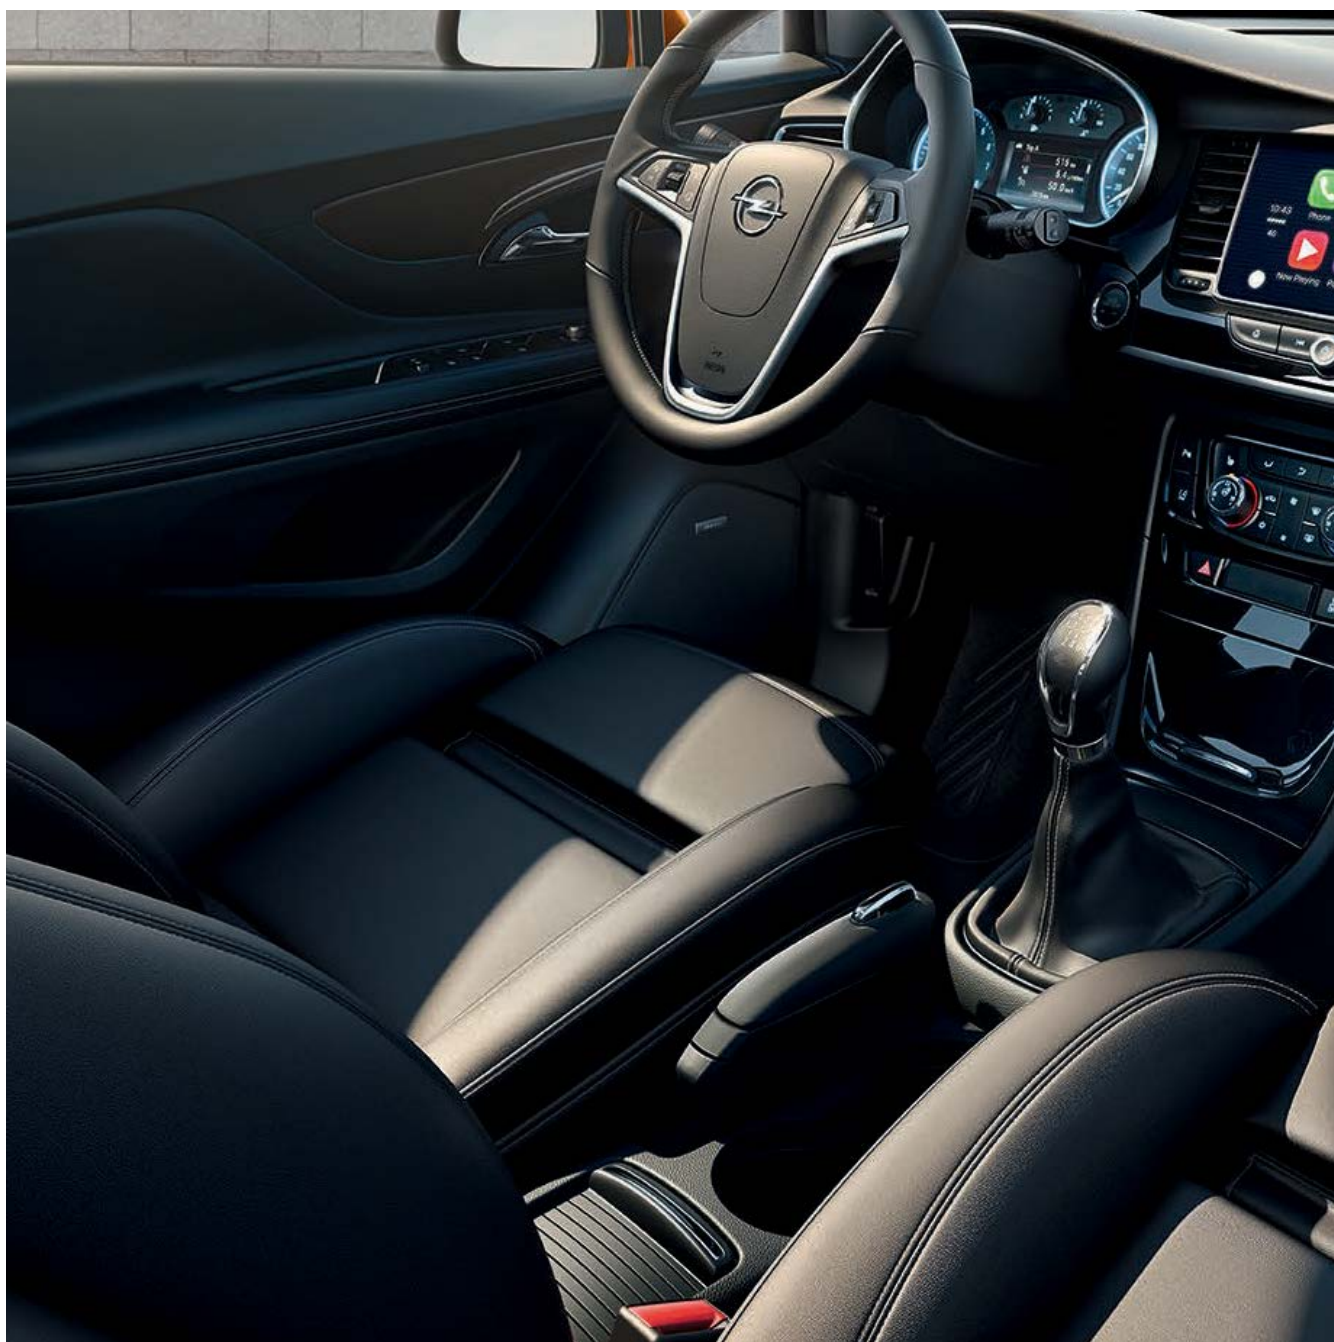

With plenty of legroom and headroom to spare, passengers will always be well catered for.

Arguments

- Outstanding space and comfort
- Premium look and feel to trims and materials
- High and wide doors
- Clever storage compartments

New MOKKA X. Healthy egoism.

Ergonomically certified AGR seats¹

Exclusive to Opel, the ergonomically certified AGR seats (Campaign for Healthier Backs) offer full-back support for those long distance hauls. Ergonomically certified AGR seats in the new MOKKA X let customers do more than simply get into the **optimum driver's position**.

As well as being able to adjust the **seat height, position and angle**, the 4-way passive headrests help to reduce the gap between head and headrest to a minimum ensuring optimum support and safety. Featuring extra **lumbar support** and a seating cushion that can be extended and

angled, the ergonomically certified AGR seats prove that the new MOKKA X is the perfect fit for all sizes. Ergonomically certified AGR seats are available for both **driver and co-driver sides**. The Cosmo model features heated leather AGR seats and a heated leather steering wheel.

Sunroof

Electronic air conditioning

The new MOKKA X puts wellness at the very top of its priorities.

Climate control

Premium-class climate comfort is a major advantage of the new MOKKA X, with dual-zone Electronic Climate Control standard on Enjoy and Cosmo.

Sunroof (optional on Cosmo)

Illuminate the cockpit with the electric sunroof, which tilts and slides and features an anti-trap mechanism.

Solar protection

The heat-reflecting coating for the windscreen, side windows and rear windscreen helps keep your car cool. Protect your privacy with the **dark tinted privacy glass** for the rear side windows and tailgate window, standard for Cosmo model.

Arguments

- High level of wellness and luxury
- Premium climate control options
- Ergonomically certified AGR seats

New MOKKA X. Packing power.

2nd row 60/40 split

2nd row folded flat

Despite it being designed predominantly for the driver, the new MOKKA X's **practicality** is not to be dismissed.

On lifting the tailgate, the new MOKKA X reveals yet another surprise it has up its sleeves. Despite the slim-lined body creases and compact size, the new MOKKA X manages to pack more than just a punch when it comes to loading space. With both rear seats up, **up to 356 litres** of loading capacity is made available.

For those really big loads, the **60/40 seat split** reveals a vortex of space, which can be expanded as the rear seats are adjustable so they fold **practically fully flat**, offering up to **1 372 litres**.

The new MOKKA X's practicality can be measured in more ways than capacity. Its **low loading lip** gives your back a break rather than breaking your back, ISOFIX inputs keep children out of harm's way and the fastening eyes help strap everything down safely.

So whether regularly hauling outdoors equipment along country dirt tracks on weekends or frequently packing in flat-pack furniture to furbish a new apartment, the new MOKKA X, will take it all in its stride.

Glove box

USB, aux-in

Driver's knee bolster bin

12-V power outlet

Practicality

The new MOKKA X offers lots of practical storage solutions, keeping everything you need in a logical and easy-to-reach place:

- 1 front door pocket (driver's side)
- 1 front door pocket (co-driver's side)
- 1 storage located in driver knee bolster bin
- 1 glove box
- 1 centre stack storage with USB, aux-in and 12-V power outlet that is easy to access and store items in, such as a wallet or a mobile phone
- 2 centre console cupholders
- 1 hidden storage in centre console with tambour door
- 1 seat pocket (rear side of driver seat)
- 1 seat pocket (rear side of passenger seat)
- 1 rear door pocket (left side)
- 1 rear door pocket (right side)
- 2 cupholders in centre armrest (Cosmo)

Arguments

- 356 to 1 372 litres of configurable load space
- Convenient, easily accessible storage facilities

New MOKKA X. Some customers put safety first.

Opel SAFETEC® is a fully comprehensive safety system, integrating and synchronising all aspects of active and passive safety for **maximum security** in any situation. Every Opel vehicle begins with a rigid safety frame.

To this are added energy-absorbent bumper systems with crash boxes for front and rear, progressively deformable structures and high-tensile steel side protection bars. The design and structure of these elements also means that the new MOKKA X meets all **pedestrian safety standards**.

A major advantage of Opel technology is that in low-speed impacts deformation damage is **minimised** so that **repair costs** are kept to a minimum.

In addition, the new MOKKA X also meets RCAR (Research Council for Accident Repairs) standards to reduce damage and deformation at low-speed collisions, **reducing insurance costs** in several European countries.

Other passive safety systems include smart seat-belt reminders for front and rear, dual pre-tensioned front seat belts with **front side and curtain airbags**.

For child safety, the front-passenger airbag is key-switch deactivated and there are ISOFIX child seat mountings on the outer two rear seats.

Arguments

- Fully integrated safety system
- Meets RCAR standards for repair cost reduction

Electronic Stability Program Plus (ESP^{®Plus})

All versions of the new MOKKA X are equipped with **latest-generation ESP^{®Plus}**. The tendency to oversteer or understeer is corrected with even greater efficiency and sensitivity with its three-wheel control during understeer intervention, it is almost unnoticeable in operation. Most potential customers have grown to expect it, in fact most would not consider buying a car without it.

Hill Start Assist (HSA)

For easy parking and starting on uneven surfaces, HSA **automatically holds the brakes**. When the foot brake is released, it prevents backward movement until the throttle is depressed, letting you fully concentrate on the manoeuvre without having to use the handbrake.

Hill Descent Control (HDC)

HDC automatically controls your speed and **regulates braking** to ensure hill descent remains secure and controllable even in adverse conditions on steep declines.

Arguments

- Outstanding control and road holding
- Easier hill starts
- Safer hill descents

Image shown for illustration purposes only. South African models may differ.

New MOKKA X. Smart travel companions.

R 4.0 IntelliLink

The R 4.0 IntelliLink is fully compatible with **Apple CarPlay™** and **Android Auto™**. The home screen with the main menu is shown on the **7" touch screen** and can be accessed and activated by touch, several audio and phone functions via the steering wheel controls (optional on Enjoy, standard on Cosmo).

The most important functions are:

- Hands-free calling via Bluetooth® for mobile phones including telephone book and call list.¹
- Audio streaming via Bluetooth® or music playback via USB (smartphone-dependent) displaying the title or album cover.
- Playback function for pictures and films via USB. For safety reasons, videos can only be played when the car is stationary.
- Voice recognition from connected smartphone possible (e.g. Siri).
- Phone projection (see page after next).

The list of compatible smartphones is available at your providers' websites www.apple.com or www.android.com

FM radio

DAB radio

3,5" monochrome DIC

4,2" colour DIC

Driver Information Cluster (DIC)

The new MOKKA X comes with a **3,5" monochrome** Driver Information Cluster as standard. For greater definition, the **4,2" colour** Driver Information Cluster makes for a great optional upgrade on Cosmo.

USB and aux-in connections

In addition to the aux-in connection, the USB input enables smartphones and tablets to be connected and recharged.

Radio R 300 BT

The base radio with Bluetooth® connectivity for mobile hands-free phone and audio streaming. USB and aux-in, FM/AM single tuner with 6 speakers, 6 x 6 presets and optional digital radio broadcast (DAB/DAB+), standard on Enjoy.

Arguments

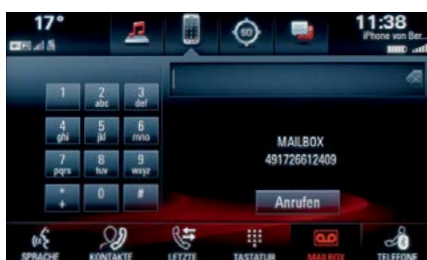

- **High-connectivity base radio with Bluetooth® and USB**

¹To check compatibility with your devices, go to www.countryspecific.url

Navi 900 IntelliLink (optional on Cosmo)
The new Navi 900 IntelliLink is the **top-of-the-line system** and features an ultra-fast processor. In addition to the functions of the R 4.0 IntelliLink, the Navi 900 IntelliLink also offers an **8" colour touch screen** and dynamic navigation in **2D or 3D high-resolution mapping**, including detailed guidance for highways etc. SMS readout and reply function, embedded voice control for audio, phone and navigation and the **SHOP for app downloads**.

- To input the **destination via voice**, it is only necessary to say the address in one-shot (town, street, house number).
- The **large-format keyboard** on the touch screen makes it easy and convenient to input the destination. The intelligent software quickly recognises the input. Even if there are small spelling or typing mistakes, fragments of the address will be enough in most cases.
- Addresses from the telephone directory can also be used as a destination input.
- **Traffic information**, e.g. TMC bulletins, are completely integrated into the map displays. Different kinds of traffic problems are recognised and can be prioritised and shown in reference to the current route, enabling choices to be made on re-routing etc.
- An illustrated **travel guide from MERIAN scout** informs about points of interest, sightseeing possibilities etc. This is an example stating that you can see the **POIs** that are in range of the followed route. The POI results can also be used as destination inputs. The maps are internally stored and updating is possible via USB.
- With the **SHOP¹**, you can download apps to your infotainment, including:
 - **Glympse[®]**: the fast, free and simple way to share your location, destination and plan journeys together with your friends
 - **The Weather Channel[®]**: real-time weather information during your journey and a weather forecast of your destination².

On-board telephone application

On-board 3D navigation with HERE maps

Glympse

The Weather Channel

Argument

- **Navi 900 IntelliLink with ultra-fast processor and user-friendly destination input**

¹Registration and acceptance of terms and conditions required during initial usage. New icon SHOP is added to the home screen. SHOP, only available with OnStar.

²Available in 13 European countries (UK, Germany, Italy, Spain, France, Poland, Belgium, Luxemburg, Netherlands, Austria, Switzerland, Portugal, Ireland) and in 8 languages (English, German, Italian, Spanish, French, Portuguese, Dutch and Polish).

³Available for Enjoy and Innovation.

New MOKKA X. Premium connections.

Phone projection

The new MOKKA X is a direct answer to the connectivity-focused society that we have become. The IntelliLink-supported **phone projection** that delivers a comfortable and convenient solution makes the new MOKKA X a front runner in its segment.

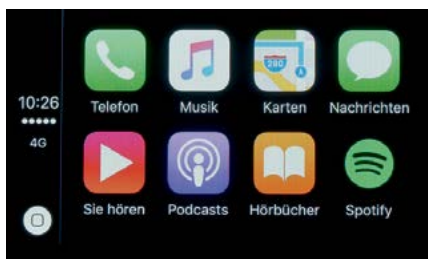

In simple terms, phone projections enables certain apps and features from smartphones to appear on the **colour touch screen** of the car. At this point, the smartphone becomes integrated into the car and can be controlled via the touch screen, **Siri** or **Google voice control** or steering wheel buttons.

Apple CarPlay™

- Available for Navi 900 IntelliLink and R 4.0 IntelliLink
- For iPhones 5 or later with iOS 8.x or later
- Siri voice control
- Basic services including maps, phone, messaging and music
- Supports third-party apps from various developers
- All apps are certified for in-car use

Google Android Auto™

- Available for Navi 900 IntelliLink and R 4.0 IntelliLink
- For phones starting with 5.0 Android Lollipop or later
- Google voice control
- Basic services including maps, phone, messaging and music
- Supports third-party apps from various developers
- All apps are certified for in-car-use

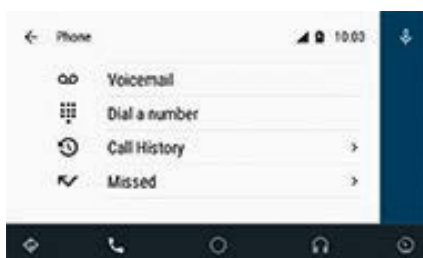

Apple CarPlay™ home screen

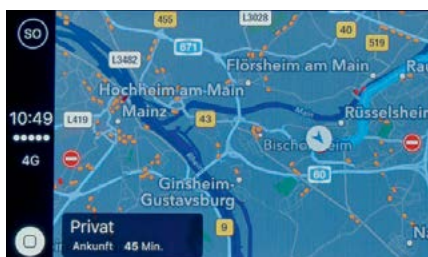

Google Android Auto™ home screen

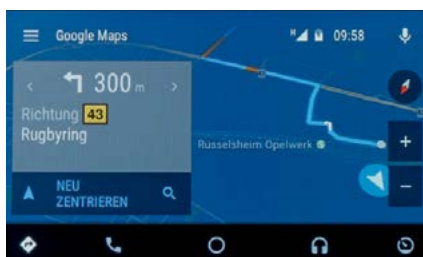

Apple Phone via CarPlay™

Telephone app via Google Android Auto™

Apple Maps via CarPlay™

Google Maps via Google Android Auto™

Apple has officially launched the Apply Car Play app in South Africa. Unfortunately, Android Auto™ is said to be available on selected devices only, no official launch by Google has occurred in South Africa as of yet.

Support for both the Apple CarPlay™ and Android Auto™ services are determined by Apple and Google respectively.

Arguments

- Customer can use smartphone functions via the infotainment system
- Access to car-optimized apps
- Increased safety and convenience
